TYC Leadership Institute: Empowering Change Agents in STEM – Develop, Lead, Transform

Introduction
Sponsored by the American Association of Physics Teachers, the TYC Leadership Institute is a fellowship designed for Two-Year College Physics faculty to develop and enhance leadership skills. This program aims to nurture leaders in the TYC physics community by providing skills and empowering participants to advocate for changes in STEM education at different levels. Join us to make a positive impact on physics education!

Methodology
The Leadership Institute will cover topics including:

- Effective Communication
- Work-Life Balance
- Finding Leadership Strengths
- Leading Change
- Valuing Diversity

Program Details
The Program Includes:

- Pre-workshop readings & discussion (virtual)
- One day summit (in-person)
- Capstone project and implementation support through mentoring (virtual)

The summit will involve experiential learning exercises and moderated discussions addressing a range of skills from effective communication to work-life balance as you connect with other like-minded peers from across the nation. You will also develop a capstone project, revolving around the development and execution of a strategic plan to address a critical issue in your context.
